

Dear Paul and Bill,

It was a sheer delight to receive you at Ellesmere College Leicester - www.ellesmerecollege.org.uk on Monday 4th December to demonstrate your ingenious invention the "Total Reaction Screen". Through our head of PE we managed to trial the TRS to a cross section of pupils with complex learning disabilities. The reaction of the students was excellent. Without doubt one could see the immediate benefits enhancing exercise, improving hand eye coordination and motivating students to join in. Overall there was an enjoyment factor.

We are certainly keen to integrate the TRS into our regular programmes at the college. We are also prepared to promote its use with other Special Schools in our region. Please let us know if you need more detailed information.

Yours sincerely

Steve White. MBE. (Awarded for promotion of Sport and Education in Leicestershire).

Ellesmere College, Leicester
